Jr. Front-end Developer

I worked in occupations that were unrelated to my field after graduating from Biology in 2015, and I got fairly far away from Biology. In the year 2020, I made the decision to enter the software sector and began working to strengthen my skills in this field. My ambition is to work as a front-end developer. As a result, I earned degrees in Web Design and Coding from Anadolu University and Computer Programming from Atatürk University. In my leisure time, I also learn HTML, CSS, and JavaScript by taking various classes. In my Github profile, I have a few little projects. The links are in my profile if you wish to have a look.

EDUCATION
